Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallace et al., US No. 3,893,496 ("Wallace") and Ueda et al., US No. 4,705,722 ("Ueda") and further in view of Friedman, US No. 5,172,841 ("Friedman") .

Wallace discloses a method for sealing a threaded joint assembly comprising a joint sealing material (FIGS. 1 and 2).

Wallace does not disclose the sealing material comprising a multifilament yarn and a joint sealing composition readily coated over the yarn.

Wallace also does not disclose the joint sealing material packaged in a dispenser.

Ueda does disclose a sealing material comprising a multifilament yarn and a joint sealing composition readily coated over the yarn in order to achieve improved sealing versatility (col. 1, line 66).

Friedman discloses material packed in a dispenser in order to provide a means for holding a yarn (mass, col. 1, line 47).

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the joint sealing assembly of Wallace as taught by Ueda

in order to provide improved sealing versatility; and further by Friedman in order to provide means for holding the yarn.
